

Java, Kotlin & Scala Comparison

Prerequisites

This seminar was developed for project managers and software development managers that explore the possibilities and consider the use of Kotlin or Scala over Java. Prior knowledge of Java programming is required.

Duration

This seminar includes two academic hours.

Premium Training

This seminar can be delivered either in Hebrew or in English. It can be delivered either online or in a Hybrid way that allows the participants to choose whether to attend the meeting room where the training takes place or to join online.

The Lecturer

This seminar is delivered by Haim Michael, an experienced, well-known software development trainer with more than 25 years of experience in software development training. Haim has more than 25 years in Java, more than 12 years in Scala, and more than eight years in Kotlin. Haim is one of the first academic lecturers that started using Scala in his academic courses (<https://bit.ly/3O7HIKQ>).

The Topics

This seminar overviews the main differences between Scala and Kotlin while comparing the two with Java. This seminar aims at assisting the decision makers in deciding whether (or not) to move forward and start using Kotlin (or Scala).
